Where to present and publish the WPR work

Chakib Madcur · checked 27 October 2026 · deadlines marked "not posted" must be confirmed on the official site

What the work is, for choosing venues. A network-science method (weighted PageRank on directed graphs of results) applied to sports rankings, with a fifty-year tennis study, an upset experiment and a cross-sport comparison. That fits three communities: **sports analytics and statistics**, **network science**, and **computer science / data mining**.

Three kinds of venue.

1. **Abstract conferences (talk or poster).** You send a 1–2 page abstract. Nothing is formally published, but it goes on the CV as a presentation. Fast and low risk; good for a first conference.
2. **Conferences with published proceedings.** You send a full or short paper (8–12 pages). If it is accepted it is *published* (e.g., by Springer), which counts as a publication on the CV.
3. **Journals.** The strongest publication. Review takes months, so it is the step after the semester presentation.

Venue	Type	When and where	Deadline	Published? Why it fits
CSAS 2027 (Connecticut Sports Analytics Symposium)	Abstract: talk or poster	9–10 Apr 2027, UConn, Storrs, CT	Talk abstracts close **1 Dec 2026**; poster abstracts **22 Mar 2027**	Not stated. Sports analytics audience, student friendly, poster awards
NetSci 2027 (International Conference on Network Science)	Abstract: talk or poster	May 2027 (main conference 18–21 May), Dresden, Germany	**1 Dec 2026** (checked last week); 1 page with one figure, official LaTeX template	No (abstract only). The main network science meeting; PageRank is a network method
CompleNet 2027 (Int. Conference on Complex Networks)	Paper or abstract	9–12 Mar 2027, University of Rochester, NY	Not posted yet; past editions were in **mid-December**	**Yes:** long (12 p.) and short (8 p.) papers published by Springer; 2-page abstracts are not published. Best chance of a *published paper* this year
JSM 2027 (Joint Statistical Meetings)	Abstract: talk, poster or speed session	8–12 Aug 2027, **Chicago**	Contributed abstracts due **1 Feb 2027** (window usually opens early December)	No (abstract). Largest statistics meeting, has a Section on Statistics in Sports; in Chicago, so no travel cost
MathSport International 2027	Paper	23–25 Jun 2027, Oldham, UK	Not posted yet	Usually a proceedings book (check). Mathematics in sport, ranking is a classic topic
Sunbelt 2027 (INSNA, social networks)	Abstract	21–26 Jun 2027, Montréal	Not posted yet	No. Network analysis community; a weaker fit than NetSci
Complex Networks 2027	Paper or abstract	Late 2027 (2026: Granada, 2–4 Dec)	Expected around **September 2027** (2026 deadline: 2 Sep 2026)	**Yes:** full papers (12 p.) in Springer proceedings; 4-page abstracts in a book of abstracts with ISBN
MLSA 2027 (Machine Learning and Data Mining for Sports Analytics, ECML PKDD workshop)	Paper	September 2027, Europe	Not posted; usually early summer	**Yes:** Springer CCIS proceedings. Computer science audience
MIT Sloan Sports Analytics Conference	Paper competition	March, Boston	Closed for 2027 (1 Oct 2026)	Option for 2028

Journals (after the semester presentation)

- **Journal of Sports Analytics** (IOS Press / Sage): open access with **no publication fee** (DOAJ record).
- **Journal of Quantitative Analysis in Sports** (American Statistical Association, De Gruyter): "team ranking methods" is listed in its scope; double-anonymous review.
- **International Journal of Computer Science in Sport** (Sciendo): open access since 2016; check the fee page before submitting.
- **Applied Network Science** (Springer Open): network-science applications; open access with an article fee.

Suggested plan

1. **By 1 December 2026:** one-page abstract to **NetSci 2027** and an abstract to **CSAS 2027** (the same results; the cross-sport figure or the upset figure as the one figure).
2. **December 2026:** an 8-page short paper to **CompleNet 2027**, if Prof. Dantsin agrees and the deadline is confirmed. This is the quickest route to a published paper.
3. **By 1 February 2027:** contributed talk or poster at **JSM 2027** in Chicago.
4. **Summer 2027:** full paper to a journal (Journal of Sports Analytics or JQAS) or to Complex Networks 2027.

Questions for Prof. Dantsin / Mariel: Does Roosevelt fund registration or travel for student presenters? Is there a Roosevelt or Chicago-area student research symposium in spring 2027? Should the CompleNet paper list Prof. Dantsin as co-author?
